ARCHITECTURE HUNTER AWARDS 2024

ARCHITECTURE HUNTER AWARDS (AHA) 2024
HONORING ARCHITECTURE THAT MATTERS

Architecture Hunter, a globally recognized digital media platform with Brazilian origins, launched in 2024 the inaugural edition of the Architecture Hunter Awards (AHA). With the aim of celebrating excellence in architecture for an international audience, AHA seeks to highlight and honor innovative and impactful design across various categories.

ABOUT ARCHITECTURE HUNTER

Architecture Hunter is a digital media platform dedicated to showcasing the best in architecture and design. Born in the digital realm, the platform started as an Instagram page in 2013 and has since expanded to include a comprehensive website, YouTube channel, and presence on various social media platforms. With a focus on curation, design-driven content, and priority communication through video, Architecture Hunter serves as a source of inspiration, information, and entertainment for millions of architecture enthusiasts worldwide.

“

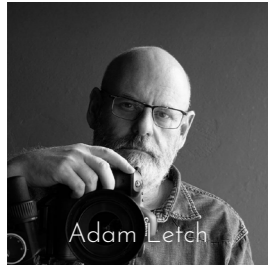

Architecture shapes our world—it's the stage on which life unfolds. At Architecture Hunter, we believe in sharing architectural knowledge globally and meaningfully. Our mission is to spotlight impactful work, delivering inspiration and insight that resonates.

To be an 'archi-hunter' means embracing collaboration, sharing knowledge while learning from current practices. Our purpose is to inspire, inform, and entertain, connecting people through architecture that transforms our experiences.

HONORABLE MENTIONS

M.O.R.E. CLT CABIN

/ BY KARIOUK ARCHITECTS

North American cottages often evoke log cabins in forests, but they're usually wood-clad suburban homes on cleared land. These homes falsely suggest environmental respect. The m.o.r.e. CLT Cabin, however, genuinely respects its forest site by separating itself from the land. Its innovative structure and materials reduce its carbon footprint and leave the site untouched. It creatively interprets zoning laws, uses a steel mast foundation to minimize impact, utilizes low-waste CLT, runs on off-grid power, and supports endangered bats.

OG HOUSE

/ BY OMAR GANDHI

Located in the vibrant, historic North End of Halifax, Nova Scotia on a narrow and abandoned lot. In the decades prior, the adjacent property was the site of a neighbourhood African Nova Scotian barbershop. The project was designed with the intention of becoming the primary residence of Omar Gandhi, his partner, and his son, sitting over top of what would become the architecture studios' east coast home base. However, over the course of the build, the studio grew to a level that could no longer be accommodated in the modest space.
